Dear Mr. Sankranti,

Subject: Acceptance of the use of Ingenium Marine Solutions Pvt. Ltd. eZ-orb, electronic oil record book on board vessels flying the flag of the United Kingdom of Great Britain & Northern Ireland.

Further to your presentation, we are pleased to confirm that, following a review of the eZ-orb system against the guidance for the use of electronic record books (International Maritime Organization's Guidance MEPC.1/Circ.736 Rev.2), this eZ-orb system may now be used on board vessels flying the flag of the United Kingdom of Great Britain & Northern Ireland.

The eZ-orb system has been issued a Software Conformity Certificate by Lloyd's Register and meets the requirements of MARPOL Annex I, Regulations 17 and 36, and the International Maritime Organization's Guidance MEPC.1/Circ.736 Rev.2.

You are requested to advise users that they abide by any local requirements imposed by port States which may require maintenance of the paper-based ORB in the form specified in MARPOL.

Please note that future acceptance of electronic ORBs will be subject to completion of ongoing work at IMO which may result in amendments to MARPOL and pave the way for sole use of such systems.

You are required to update the system as required and keep us informed of any changes.

Best Regards

Prasad Panicker
